

# SO-2 Electric

## portable aspirator

SO-2 is a portable aspirator which applies in doctors' offices, nursing homes and patient's home use.

The aspirator SO-2 is a device with a compact design, convenient to use. A well balanced handle allows for easy portability and solid casing ensures long-term operation and ease of cleaning.

- stepless adjustment of the maximum vacuum
- clear indication of the current value of the vacuum
- convenient carrying handle
- practical handle for the power cord
- quiet and continuous operation
- foot switch
- reusable containers 1l or 2l
- disposable cartridges 1l or 2l

All electrical aspirators and operating with central vacuum systems are equipped with:

- reusable bottles and lids which can be sterilized at 134° C,
- two-stage protection in the form of a float valve and hydrophobic-antibacterial filter that protect the device against flooding and the staff and patients against pathogens.

Catalogue number	SO-02-20
Name	<b>SO-2 Ogarit</b>
Max air-flow	20 l/min
Max vacuum level	do 80kPa (+0%/-10%)
Vacuum adjustment range	(0÷80)kPa
Capacity of the collecting containers	1l lub 2l
Type of applied parts	CF
Isolation class	II
Power consumption	70VA
Power supply	230V/50Hz
Dimensions	400x250x320mm
Weight	6kg
