

SO-4 Electric aspirator

for medical procedures

The aspirator SO-4 is designed for suction of secretions and liquids during medical procedures. This device is mainly used in the treatment rooms and in the hospital emergency units.

The aspirator SO-4 is specially designed casing that allows placement of two reusable collecting containers. Therefore, the aspirator can be used for long lasting treatments involving a large amount of suctioned fluids. The aspirator is mounted as standard on the low trolley and has a convenient handle in order to facilitate its displacement.

- stepless adjustment of the maximum vacuum
- clear indication of the current value of the vacuum
- convenient carrying handle
- practical handle for the power cord
- quiet and continuous operation
- foot switch
- reusable containers 1l or 2l
- disposable cartridges 1l or 2l

Optionally the aspirator SO-4 may be furnished with the aesthetic, stable trolley. Placing the aspirator on the trolley increases its functionality. The trolley can be equipped with an instrumental rail, to which you can attach additional accessories.

Catalogue number	SO-04-20	SO-04-30
Name	SO-4/E	SO-4/T
Max air-flow	20 l/min	30 l/min
Max vacuum level	do 80kPa (+0%/-10%)	do 85kPa (+0%/-10%)
Vacuum adjustment range	(0+80)kPa	(0+85)kPa
Capacity of the collecting containers	max 2x2l	
Type of applied parts	CF	
Isolation class	II	
Power consumption	70VA	
Power supply	230V/50Hz	
Dimensions	370x300x530mm	
Weight	8kg
